

Poster Presenters
(in alphabetical order)

Presentation Day	Presenter First Name	Presenter Last Name	Presenter Institution	Title	Poster #
3	Aya	Aboulhosn	University of Texas Health Science Center at Houston & Children's Memorial Hermann Hospital	Influence of the COVID-19 Pandemic on Antimicrobial Resistance Patterns in Pediatric Group A Streptococcus Infections in Houston, TX	61
1	Diego	Alvarez	University of Texas Medical Branch	The Use of Secondary Metabolites From Zingiber officinale as an Adjuvant Treatment to Multidrug-Resistant Bacteria	8
1	Abigail	Amaya	Houston Methodist Research Institute	Comparative Analysis of Vancomycin-Resistant Enterococci: Gut Colonization Vs. Clinical Isolation in ICU Patients	11
1	Eva	Amenta	Baylor College of Medicine	Organizational Readiness Assessment for a National Antimicrobial Stewardship Intervention	7
3	Eva	Amenta	Baylor College of Medicine/MEDVAM C	Sociodemographic Factors Associated with Knowledge of Antibiotic Risks Among an Outpatient Population	62
2	Dierdre	Axell-House	Houston Methodist Research Institute	Epidemiology of Infections with Multidrug-Resistant Organisms in Patients with Left Ventricular Assist Devices (LVADs)	31
1	Pierce	Bassett	University of Texas Medical Branch	Addressing the Mounting Threat of Antibiotic Resistance Through the Lens of Global Health Advocacy	12
2	Caroline	Black	Texas Tech University	Changes in Antibiotic Susceptibilities Attributed to the Infection Environment	32
1	Sophia	Braund	Baylor College of Medicine	Organizational Readiness Assessment for a National Antimicrobial Stewardship Intervention	13
1	Evan	Chandlee	University of Texas Medical Branch	The Evolving State of Collateral Sensitivity Treatment Regimens as a Potential Solution to Multidrug Resistant Bacteria	14
2	German	Contreras	University of Texas Medical Branch	ESBL Bacteremia During the First Year After Solid Organ Transplantation	33
1	Shane	Cristy	University of Texas Health Science Center at Houston	Candida Species Develop Antifungal Resistance in Urinary Catheter Infections Despite Lack of Antifungal Treatment	15
1	Andrea	deTranlates	Houston Methodist Research Institute	Characterization and Clinical Effects of Colonization by Multidrug Resistant Pathogens in Immunocompromised and Critically Ill Patients	16
1	Jesus	Duran Ramirez	University of Texas Health Science Center at Houston	A Prospective Randomized Clinical Trial to Assess Antibiotic Pocket Irrigation on Tissue Expander Breast Reconstruction	17
1	Chetna	Dureja	Texas A&M Health Science Center Institute of Biosciences and Technology	Evaluation of De Novo Fatty Acid Biosynthesis as a Narrow-Spectrum Approach for Clostridioides difficile infection	18
1	Brianna	Eales	University of Houston	Evaluation of Alternative Iron-Depleted Media and Chelator Pairs for Cefiderocol Susceptibility Testing	19
1	Stephanie	EGge	Oregon Health & Science University	Cefepime Heteroresistance is Prevalent Among Clinical Pseudomonas aeruginosa Bloodstream Isolates and is Associated with Emergence of Resistance in Patients with Hematologic Malignancies	20
1	Jiayi	Fan	Baylor College of Medicine	Discovery of Novel Broad-Spectrum Antibiotics and Inhibitors for Beta-Lactamases using Combinatorial Chemistry Approaches	21
1	Mithila	Farjana	University of Oklahoma	Determining the Molecular Mechanism of Antibiotic Resistance by BpeEF-OprC Pump in Burkholderia Thailandensis	1
1	Erika	Flores	Houston Methodist Research Institute	Characterizing the Cefazolin Inoculum Effect (CzIE) in Methicillin Susceptible Staphylococcus aureus Strains (MSSA) Recovered from Patients with Bacteremia at a Houston Hospital System	22
2	Kevin	Garey	University of Houston	A Phase 2, Randomized, Double-Blind Study of ibezapolstat Compared With Vancomycin for the Treatment of Clostridioides difficile Infection	43
1	Homar	Garza	University of Texas Medical Branch	The Crash of Antibiotic Stewardship in the Wake of the Covid-19 Global Pandemic	23
1	Jana	Gomez	University of Texas Health Science Center at Houston	Understanding the Role of Methicillin Resistant Staphylococcus aureus Urease on Catheter-Associated Urinary Tract Infections	24

Poster Presenters
(in alphabetical order)

Presentation Day	Presenter First Name	Presenter Last Name	Presenter Institution	Title	Poster #
1	Miranda	Hairgrove	University of Texas Southwestern Medical Center	Alternating Magnetic Fields Enhance the Effects of Antibiotics on Biofilms	2
1	Samantha	Hitt	University of Texas Health Science Center at Houston	Elucidation of the Molecular Signal for the Regulator of Capsule Synthesis Stress Response	25
1	Kara	Hood	Houston Methodist Research Institute	Mutations in LiaF of Enterococcus faecalis Associated with Daptomycin Resistance (DAP-R) Differentially Affect Interaction Dynamics with the Histidine Kinase LiaS in Lipid Nanodiscs	3
1	Mason	Howell	Rice University	How Phage-Antibiotic Combinations Suppress Resistance and Improve Clearance of AMR E. Coli	26
1	Kendall	Howen	University of Texas Health Science Center at Houston	A Single-Center Quality Improvement Project to Reduce Antibiotic utilization in Gastroschisis Patients	27
1	Chenlin	Hu	University of Houston	Development and Validation of LC-MS/MS for Quantifying Omadacycline from Stool for Gut Microbiome Studies	28
3	Cole	Hudson	University of Houston	Mechanisms of Gelofusine Protection against Polymyxin B-Associated Renal Injury	69
2	Ricky	Huynh-Phan	Baylor College of Medicine/St. Luke's Medical Center	Evaluation of the Clinical Impact of Rapid Diagnostic Testing with BioFire® FilmArray® Blood Culture Identification 2 Panel on Antimicrobial Stewardship Interventions	41
2	Jinhee	Jo	University of Houston	Investigation of Fecal pH as a Gut Dysbiosis Marker in Healthy Volunteers Given Omadacycline or Vancomycin	42
3	Petar	Jordanov	University of Houston	Characterization of Non-Carbapenemase Producing Carbapenem-Resistant Klebsiella Pneumoniae in a Health System in Houston, Texas	63
1	Bishnu	Joshi	Baylor College of Medicine	Investigating the Potential of Bacteriophage to Limit Uropathogenic E. coli Colonization.	4
3	Paul	Kilgore	University of Texas Medical Branch	Antimicrobial Peptides and Immunomodulatory Therapeutics to Combat Multidrug Resistant Priority Pathogens	74
3	Rachelle	Koch	University of Texas Southwestern Medical Center	Geospatial and Genomic Epidemiology of Clinical Burkholderia pseudomallei Isolates in Cambodia	64
3	Rachel	Lahowetz	Baylor College of Medicine	It Takes Two to Tango: Determining how Phage and Ciprofloxacin Interact to Combat AMR Pathogens	88
3	Lindsey	Laytner	Baylor College of Medicine	Situations Predisposing Primary Care Patients to Use Antibiotics Without a Prescription in the United States	65
3	ThanhPhuong	Le	University of Houston	Basis of Fidaxomicin Resistance in Clostridioides difficile: A Systematic Review and Meta-analysis	66
2	Christina	Lin	Emory School of Medicine	Rates of Resistance and Heteroresistance to Newer β -lactam/ β -lactamase Inhibitors for Carbapenem-Resistant Enterobacterales	44
2	Nian	Liu	Baylor College of Medicine	Clostridium septicum and C. difficile Compete for an Intestinal lipid-rich Environment Lacking in Naturally Evolved Antimicrobial Activity.	45
2	Rulong	Ma	University of Houston	The Large Tilting Motion of the Central Core in SERCA Couples the ATP Hydrolysis and Ca ²⁺ Transport.	46
2	Ann	McKelvey	Texas A&M Institute of Biosciences and Technology	Investigating Fitness Costs of Fidaxomicin-Resistant Clostridioides difficile	47
2	Jacob	McPherson	University of Houston	Basis of Commensal Bacillota Resistance to a Novel PolC-type DNA Polymerase III Inhibitor, Ibezapolstat, and the "Narrower" Spectrum of Activity towards Clostridioides difficile	34
2	Amanda	Moser	Baylor College of Medicine	Staphylococcus aureus Increases Staphyloxanthin Production in Response to Colonization on Human Nasal Organoids (HNOs)	48
2	Arindam	Naha	University of Texas Health Science Center at Houston	Defining the Mechanisms by Which Phage -Encoded Peptides Inhibit Cell Division in Gram-Negative Bacteria: A Promising Gateway Towards Alternative Therapeutics of Bacterial Infections	35

Poster Presenters

Presentation Day	Presenter First Name	Presenter Last Name	Presenter Institution	Title	Poster #
2	Dignite Fabrice	Ngango	Baylor College of Medicine	KPC Variants: From a Good Carbapenemase Towards an Ultraspecialized Enzyme for Ceftazidime Resistance	49
2	Mabry	Nichols	University of Texas Medical Branch	Exploring the Impact of Antibiotic Stewardship Programs on Pediatric Medicine	50
2	Giselle	Ortiz	Houston Methodist Research Institute	ICU-based Infection and Colonization in Diabetic Cohort	51
2	Diana	Panesso Botero	Houston Methodist Research Institute	LiaF is an Activator of the LiaR-Mediated Response Against Daptomycin (DAP) in Multidrug-Resistant <i>Enterococcus faecalis</i> (Efs)	52
3	Nazanin	Pouya	University of Houston	In Vitro Evaluation of Using Ceftazidime/Avibactam against Carbapenem-Resistant <i>Acinetobacter baumannii</i>	70
2	Isaac	Prah	Texas A&M Institute of Biosciences and Technology	Discovery of Vancomycin Resistant <i>Clostridioides difficile</i> Isolate with gdpP Deletion, Showing Survival in Physiological Vancomycin	53
2	Hannah	Reeves	Texas A&M Institute of Biosciences and Technology	Iron Transporter: FeoB1, and Pyruvate Contribute to the Toxin Biosynthesis Pathway in <i>Clostridioides Difficile</i>	54
1	Jinnethe	Reyes	Universidad El Bosque	Phylogeny of Mercury Reductase Protein MerA in <i>Staphylococcus aureus</i> from Bloodstream Infections Recovered from Latin-America	9
1	Jinnethe	Reyes	Universidad El Bosque	Transcriptional Expression of the Genes Associated to Amino Acid Biosynthesis and Virulence in Methicillin-Resistant <i>Staphylococcus aureus</i> (MRSA) USA300-LV is Modulating by Mercury	10
2	Jinnethe	Reyes	Universidad El Bosque	The Pre and Post-Occupancy Comparison of Environmental Microbiota in the Adult Intensive Care Unit of a High-Complexity Hospital from Colombia	37
2	Jinnethe	Reyes	Universidad El Bosque	Validation of the Modified Rapid Test for Detection of the Cefazolin Inoculum Effect (CzIE) in Bloodstream Methicillin-Susceptible <i>Staphylococcus aureus</i> from North and Latin America.	38
2	Jinnethe	Reyes	Universidad El Bosque	Cefazolin Inoculum Effect in Commensal Methicillin Susceptible <i>Staphylococcus aureus</i> MSSA Recovered from Nasal Cavity of Patients in Intensive Care Units in Colombia	39
3	Jinnethe	Reyes	Universidad El Bosque	Potential Pathogenic Bacteria Identified On Inanimate Surfaces in Adult and Surgical Intensive Care Units From a High Complexity Hospital in Colombia	67
3	Jinnethe	Reyes	Universidad El Bosque	Validation of the Modified Rapid Test for Detection of the Cefazolin Inoculum Effect (CzIE) in bloodstream Methicillin-Susceptible <i>Staphylococcus aureus</i> from North and Latin America	68
2	Paola	Rivera	Baylor College of Medicine	The Role of β -lactamase Active Site Loop Conformation for Binding and Inhibition by the β -lactamase Inhibitory Protein (BLIP)	55
2	Susana	Rodriguez	University of Texas Health Science Center at Houston	BamE Essentiality in <i>Pseudomonas aeruginosa</i> is Linked to Cyclic Nucleotide Signaling.	56
2	Cherubina	Rubannelsonkumar	University of Texas Medical Branch	Tinidazole Salvage Therapy for Metronidazole-Resistant <i>Trichomonas Vaginalis</i> Characterized by Single Nucleotide Polymorphism in the ntr6Tv Nitroreductase Gene	57
2	Jacob	Rutherford	Texas A&M University Institute of Biosciences and Technology	<i>Fusobacterium nucleatum</i> Enoyl-ACP Reductase II (FabK): A Narrow-Spectrum Drug Target	40
2	Madhab	Sapkota	University of Texas Southwestern Medical Center	High Throughput Screening Reveals β -Lactamase Synthesis Regulator / Muropeptide Transporter (ampG) as Involved in β -lactam Resistance in <i>Klebsiella pneumoniae</i>	58
3	Marissa	Schettino	Houston Methodist Research Institute	Epidemiology of Bacterial Infections Among Critically Ill Patients with Acute Kidney Injury: A Sub-study of The DYNAMITE Prospective Cohort	72
2	Selvalakshmi	Selvaraj Anand	Rice University	Identification of A Novel ST307 Sub-clade in Third Generation Cephalosporin Resistant <i>Klebsiella Pneumoniae</i> Causing Invasive Infections in the United States	36
